

MARY HOPKINS, BSW, MHR

CLINICAL DIRECTOR, TRANSITION HOUSE, INC.
SINCE SEPTEMBER 2012

I believe that recovery is possible. Recovery takes hard work, discipline, and positive life changes that remove negative influences. Recovery is not easy but with the proper motivation, support system, and hope it is possible. Working at Transition House has strengthened my belief in recovery while making me more aware of the struggles that clients face. This awareness has strengthened my commitment to the clients we serve and to advocacy for healthy mental health services. I am honored to be a part of the clients' journey while they are here at Transition House and as their journey continues through the Outreach program.
